

WEWORK RENOVATION

Energy Savings

The Challenge

WeWork converts existing spaces into modern, beautiful, shared office spaces. With increasing occupancy, more air required treatment to ensure excellent indoor air quality.

The Solution

WeWork selected the GPS-DM48-AC™ to provide the best indoor air quality while minimizing costs by reducing the amount of outside air needed to ventilate the space. When new HVAC equipment is required, the GPS-DM48-AC permits smaller solutions. In other cases, the GPS-DM48-AC allows the owner to use the existing HVAC equipment. The self-cleaning needlepoint bipolar ionization equipment is perfect because it is mountable on any indoor or outdoor duct.

REDUCED
RENOVATION
COST BY OVER
50%

The Results

WeWork realized greater than 50% savings in the HVAC renovation costs by installing smaller air-handling equipment while shortening their building upfit timeline. By using the GPS-DM48-AC, WeWork also reduced the amount of energy required to condition their spaces, realizing savings in operating expenses while creating "a world where people work to make a life."
